

# Fibre Network build for Malahat Nation

In collaboration with Malahat Nation & TELUS, F3 Networks is working closely with Malahat Leadership & Administration to bring a fibre optic connection directly to all homes and businesses within the **Malahat community** by February 2025.

Once the build is complete, TELUS will work directly with Malahat Nation to launch the PureFibre service to the community.

## What will I see during the upgrade?

Starting **November 12**, the F3 Networks crew and authorized contractors will be placing fibre cable along the existing aerial utility service path throughout the community.

## Fibre Drops

- A fibre drop is a dedicated cable connecting your home to the fibre infrastructure placed along the roadways. This fibre can have two routes to connect to your home:
  - **Aerial:** If your home is serviced from the telephone poles, the fibre cable will come from the same pole infrastructure directly to the side of your home
  - **Underground:** If your home is serviced with buried power and communication facilities, F3 will strive to utilize existing conduit infrastructure
- There is no obligation to sign up for services when a fibre line is installed

## Who is F3 Networks Canada Inc.

We are a Canadian company registered with the CRTC as a telecommunications carrier. F3 Networks Canada Inc. has a commercial agreement with TELUS to bring Purefibre services to Malahat Nation.

## What is PureFibre?

TELUS PureFibre provides access to Internet services of up to 1.5 Gbps down and 940 Mbps up, TELUS Optik TV, TELUS SmartHome Security services, TELUS Secure Business and much more! Fibre enables a lightning-fast internet connection that is never shared and never slows down, even during peak hours. Upgrading to fibre is an investment that will ensure the network can withstand the demands of new technologies which will be realized over future generations.
